

ABIOTIC PLANT STRESS REDUCTION

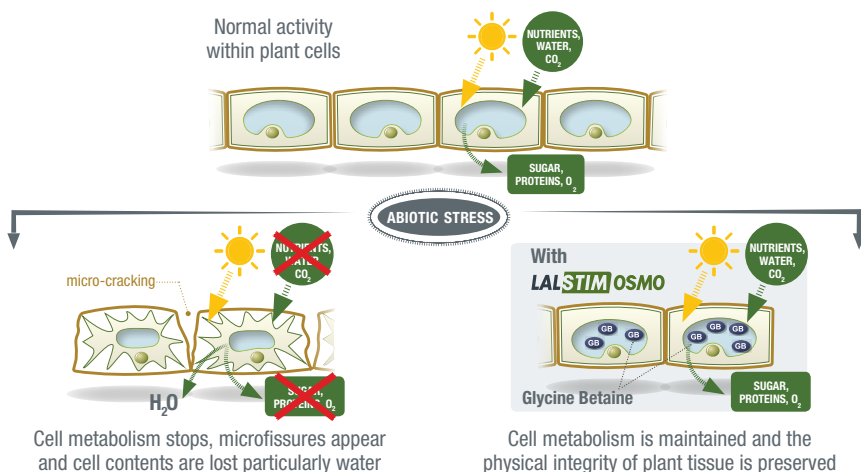

Build your plant's tolerance to abiotic environmental stress. LALSTIM OSMO is a **highly soluble wettable powder formulation of Glycine Betaine** that provides **persistent osmoprotection** so your plants can withstand harsh environmental conditions for several weeks. This water-soluble formulation is compatible with most tank mix inputs and is highly stable.

ADVANTAGES

- Sustains plant performance under abiotic stress conditions.
- Improves water uptake and maintains crop resilience.
- Translocates into the plant within 24-48 hours and persists for several weeks.
- Minimizes yield losses caused by fruit injury such as bursting, mottling and cracking.
- Minimizes post-harvest fruit decline by preserving stability of cellular osmotic pressure.

MODES OF ACTION

As an osmoprotectant, LALSTIM OSMO facilitates water uptake and retention, and adjusts the osmotic balance in plant cells and tissues. This allows for improved photosynthesis, nitrogen metabolism, and nutrient translocation during adverse environmental conditions such as heat, cold, drought, and high salinity.

CHARACTERISTICS

Active Ingredient

Glycine Betaine >97%

Guarantee

> 2 x 10⁹ CFU/g

Package Size

10 x 5 lbs

Storage information

Store sealed in the original packaging in a cool, dry place (< 77°F) for up to 36 months.

Always read and follow label instructions.

RECOMMENDED CROPS

Greenhouse
Fruit & Vegetables

Field-Grown
Fruit & Vegetables

Ornamentals

Stone & Pome
Fruit Trees

✓ TRIAL RESULTS

Fruit Cracking on Apricot

Variety: Magic Cot.
(Saint Gilles, France - 2014)

% MARKETABLE FRUITS

Bitter Pit on Apple

Variety: Golden
(CEFEL, France - 2012)

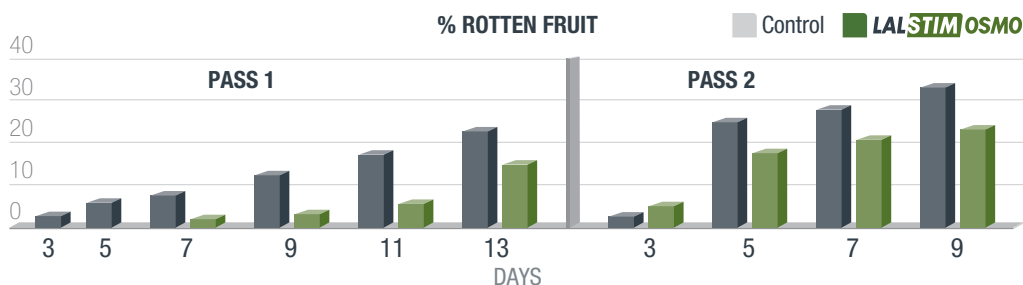

NUMBER OF LESIONS PER 100 FRUIT

POST-HARVEST IMPROVEMENT

Storage Rot of Nectarine

Variety: Moncante
(GRCETA, France - 2013)

APPLICATION RATES

CROP	APPLICATION RATE (lbs/acre)	APPLICATION VOLUME (U.S Gallons/acre)
Leafy vegetables (e.g., lettuce, spinach)	0.5-4	20-100
Fruiting vegetables and cucurbits (e.g., tomato, bell pepper, eggplant, cucumber, squash, melons, watermelon)	0.5-6	20-100
Grapevines	0.5-2	20-100
Fruit & nut trees (e.g., apple, pear, apricot, peach, almond, citrus)	0.5-6	20-150
Cherries	2-6	50-150
	2-6	25-150
Small fruit (e.g., strawberry, raspberry, blueberry, elderberry, currant)	1-6	20-150
Hemp & hops	1-4	20-100

Refer to the product label for additional crops.

Apply as a foliar spray to point of wetness. Add a compatible non-ionic surfactant to the spray suspension according to manufacturer's instructions to optimize coverage on plant surfaces and penetration into plant tissue. Compatible with pesticides and foliar fertilizers. It is best to check compatibility first using a jar test or by consulting your distributor or Lallemand Plant Care representative.

Timing varies by crop. Please check the label for target and timing of applications. Apply when relative humidity is high (e.g., evening or early morning) to allow the tissue to stay wet longer and ensure better uptake of LALSTIM OSMO in the plant. Repeat every 2-4 weeks.

About Lallemand Plant Care

For over 100 years, Lallemand has been an expert in yeast and bacteria manufacturing. It is now a global leader in the development, production, and marketing of microorganisms for various industries. Using sound science and know-how, Lallemand Plant Care provides effective microbial-based solutions that deliver agronomic, economic, and sustainable value to growers.
