

SOYBEAN

LIQUID

INOCULANT

ON-SEED LIQUID INOCULANT FOR SOYBEANS

LALFIX® LIQUID Soybean contains *Bradyrhizobium elkanii* selected for enhanced performance and competitiveness in soybean production. This species is known to nodulate soybean roots and fix atmospheric nitrogen in a symbiotic relationship with the plant.

ADVANTAGES

- **LALFIX LIQUID Soybean** is a high quality inoculant with 1×10^{10} viable *Bradyrhizobium elkanii* cells per ml. *Bradyrhizobium elkanii* is a new species in the market place for early and aggressive nodulation as well as balanced performance in a range of environments.
- **LALFIX LIQUID Soybean** is intended for soybean growers focusing on the benefits of strong nitrogen fixation - ultimately leading to enhanced nodulation, early vigor and higher soybean yields.
- **LALFIX LIQUID Soybean** applied on-seed delivers a large quantity of *Bradyrhizobium elkanii* directly to the root zone. The use rate for on seed application is 44.5 ml per 45.4kg of seed.
- The addition of 30 - 44.5 ml. of clean water per 45.4 kg. of seed can be added to increase liquid application volume if desired, for increased seed coverage when applying **LALFIX LIQUID Soybean** alone.
- In fields with no recent history of soybean production (less than 3 years), increasing the application rate of **LALFIX LIQUID Soybean** or adding an application of **LALFIX® PEAT Soybean** is recommended. Consult your agricultural inputs supplier for recommendations specific to your farm.

CHARACTERISTICS

Active Ingredient

1×10^{10} *Bradyrhizobium elkanii* per ml

Package Size

- Volume of 4.4 L (149 fl oz) per case
- 4 x 50 unit case

Always read and follow label instructions.

ON-SEED APPLICATION RATE

44.5 ml per 45.4 kg of seed
(1.5 fl oz per 100 lb of seed)

COMPATIBILITY

Refer to the website for a complete list of compatible pesticides, or contact your Lallemand Plant Care representative for more information.

About Lallemand Plant Care

For over 100 years, Lallemand has been an expert in yeast and bacteria manufacturing. It is now a global leader in the development, production, and marketing of microorganisms for various industries. Using sound science and know-how, Lallemand Plant Care provides effective microbial-based solutions that deliver agronomic, economic, and sustainable value to growers.
