

CHICKPEA

STERILE
POWDER

INOCULANT

DUAL-STRAIN INOCULANT FOR CHICKPEA

LALFIX® PEAT Chickpea is a high quality, dual-strain sterile peat powder inoculant that contains a select peat carrier that aids in the adhesion of the inoculant to the seed. This product can be applied on the seed through a variety of application methods that suit the grower's requirements.

ADVANTAGES

- LALFIX PEAT Chickpea is based on a sterile peat powder media which allows for an elevated delivery of *Mesorhizobium ciceri* directly to the seed.
- LALFIX PEAT Chickpea contains two unique strains of *Mesorhizobium ciceri* for balanced performance in a range of environments.
- LALFIX PEAT Chickpea contains a select peat carrier, which means better adhesion to the seed putting more inoculant in the furrow.
- LALFIX PEAT Chickpea is applied to the seed without water. Therefore, there is no drying period.
- LALFIX PEAT Chickpea can be used to double-inoculate first-year chickpeas and seeded into fields with a lower carryover of background rhizobia.
- Applying LALFIX PEAT Chickpea with an in-furrow application of LALFIX® START SPHERICAL Pulses inoculant increases and diversifies the rhizobia available to the crop.

CHARACTERISTICS

Active Ingredient

1 x 10⁹ *Mesorhizobium ciceri* CFU/g

Package Size

252 oz case (6 x 42 oz packets per case)

Always read and follow label instructions.

ON-SEED APPLICATION RATE

- 2.8 oz per 100 lbs of seed
- 1 case treats 9,000 lbs of seed
- Each 42 oz packet treats 1500 lbs of seed

About Lallemand Plant Care

For over 100 years, Lallemand has been an expert in yeast and bacteria manufacturing. It is now a global leader in the development, production, and marketing of microorganisms for various industries. Using sound science and know-how, Lallemand Plant Care provides effective microbial-based solutions that deliver agronomic, economic, and sustainable value to growers.
